**THE SAN FRANCISCO POLICE DEPARTMENT**
**ADMINISTRATIVE CODE CHAPTER 96A.3 REPORT**
**3rd Quarter: July 1, 2017 to September 30, 2017**

**EXECUTIVE SUMMARY**

As part of the national conversation on police reform, including accountability and transparency in law enforcement, accurate data collection has taken center stage. In the forefront is whether specific identifying characteristics (i.e., race/ethnicity, gender, or age) play a role in the outcome of encounters between law enforcement officers and members of the public, especially as it relates to the level of force used, the rate of arrest, and/or the propensity to search an individual.

In order to evaluate the effectiveness of the reforms undertaken by the San Francisco Police Department (the Department), and more importantly, to ensure procedural justice is evenly applied throughout all neighborhoods within our city, the Department is dedicating resources to re-evaluate the data collection process in place for collecting data as required by legislation, (California AB 953 and San Francisco Administrative Code 96A).  It is important to the Department that the information collected is properly reported; therefore, these reports will continue to evolve as the technology is streamlined in our efforts to provide clear and concise data.

The Department has continued its efforts to rebuild the community's trust in a variety of ways, including training all sworn members in fair and impartial policing strategies, focusing on procedural justice and implicit bias. Coupled with the updated training in use of force principles that emphasize proportionality and the Crisis Intervention Team (CIT) philosophy, officers are being equipped with the tools and knowledge needed to assess and de-escalate situations with the goal of preserving life.

Detailed reports are generated and forwarded to the Chief of Police, Assistant Chiefs, and Deputy Chiefs for review. Commanding officers review the reports with district captains and unit supervisors as a means to monitor and identify concerns immediately. As required under Administrative Code 96A.3, Law Enforcement Reporting Requirements, the Department is submitting this report for the third quarter of 2017 (July, Aug, Sept).  This report contains information relating to Encounters, Arrests, Use of Force, and Complaints, including the following information:

*Sec. 96A.3.*
  (a)   For Encounters:
    (1)   The total number;
    (2)   The total number broken down by race or ethnicity, age, and sex;
    (3)   The total number of searches performed broken down by race or ethnicity, age, and sex;
    (4)   The total number of each type of search performed;
    (5)   For each type of search performed, the total number broken down by race or ethnicity, age, and sex;
    (6)   The total number of each type of disposition, and the total number for each disposition broken down by race or ethnicity, age, and sex; and
    (7)   The data for Encounters required to be reported by this subsection (a) shall be reported separately for Detentions and Traffic Stops;
  (b)   Use of Force:
    (1)      The total number of Uses of Force;
    (2)      The total number of Uses of Force that resulted in death to the person on whom an Officer used force; and
    (3)      The total number of Uses of Force broken down by race or ethnicity, age, and sex.

  (c)      Arrests:
    (1)      The total number; and
    (2)      The total number broken down by race or ethnicity, age, and sex;

  (d)   Reason for Encounters.

  (f)   Department of Police Accountability data on alleged bias related complaints.

This quarterly report will be available to the public on the Department's website as part of an ongoing commitment to transparency. Once the process is fully automated, the datasets used to generate the reports will be published alongside the report to provide the information in a searchable format.

## SEC. 96A.3 (a) - ENCOUNTERS
On January 3, 2017, the Department implemented a new contact data collection program, eStop, to be used by officers to record relevant information gathered during encounters, whether self-initiated or dispatched. The eStop application used to collect the data during an encounter is available via Department-issued mobile devices.

**Definitions:**
*Encounter***:** The definition for encounter per Chapter 96A specifically states, "A detention or traffic stop where the officer initiates activity based solely on the officer's own observations or the observations and direction of another officer, rather than on information provided by dispatch or reported by a member of the public, i.e., self-initiated stops."

In order to comply with state law, (AB 953), the Department collects data for **all** encounters; both self-initiated and dispatched. However, the information is reported separately in order to meet the requirements of Chapter 96A. This Executive Summary only contains information on 'self-initiated' encounters and traffic stops conducted by officers as required by Chapter 96A.

For the entire report including 'dispatched' encounters and traffic stops, please refer to the attached report.

***Detention***: An interaction between an officer(s) and an individual(s) in which the officer(s) detains the individual(s).

***Traffic Stop***:  An interaction between an officer(s) and an individual(s) driving a vehicle, in which the officer conducts a stop of the vehicle. When enforcing traffic laws during a traffic stop, the Department uses the definition of a vehicle to include motor vehicles and bicycles. Information on passengers of vehicles who are detained during a traffic stop is included under this section.

## SEC. 96A.3 (b) - USE OF FORCE

The Department continues to focus on training its officers on the importance of the proportionality of the use of force (using only that force which is reasonable to perform one's duties), as well as effective communication and de-escalation techniques with an emphasis on safeguarding the sanctity of life, dignity, and liberty of all persons.

The Department has expanded its commitment to the Crisis Intervention Team (CIT) concept, and as of October 2017 has trained 792 sworn and 19 non-sworn personnel, as well as four clinicians from the Department of Public Health in the updated training curriculum. Included in this number are probationary and veteran officers, as well as members of the command staff. As the CIT program moves forward, the goal of the Department is to provide this 40-hour training to all members, including recruit police officers after graduation from the Academy. The program focuses on a team deployment concept throughout all districts and instills the importance of the guardian mentality during public contacts.

Following the creation and implementation in January 2017 of Department General Order 5.21, the Crisis Intervention Team Response to Person in Crisis Calls for Service, the Department continues to work in close partnership with City agencies and community stakeholders in the development of the CIT training program, including the National Alliance on Mental Illness (NAMI), The Mayors Office on Disability Counsel, San Francisco Mental Health Association, the Homeless Coalition, District Attorney's Witness and Victim Program, and the San Francisco Public Defender's Office among other advocates and associations. The CIT policy can be viewed on our website at http://sanfranciscopolice.org/dgo.

In addition, in February 2017, officers began training in the CIT/Threat Assessment/De-escalation and Use of Force Field Tactics classes which trains officers on the elements contained in the updated Department General Order, 5.01, Use of Force. Currently 1050 officers and one civilian have participated in this 20-hour course with the goal of training all members by the end of the year.  In an effort to ensure a strong partnership with the Department of Public Health, we have trained the Crisis Intervention Specialists (Clinical Psychologists) who work with the Department.

The Department and the Department of Public Health (DPH) entered into an agreement to provide support to officers in the field who are responding to crises in which behavioral health concerns may be present. The DPH Behavioral Crisis Intervention Specialist Team was established as a result of an initiative from the Mayor's office. This collaboration currently is in

the observation and training period as the two agencies coordinate the efforts, logistics, and protocols of deployment of the specialists to provide on-scene support during crisis situations. DPH clinicians have responded to at least seven incidents involving a person in a behavioral crisis resulting in a critical incident deployment. A program has been initiated with DPH clinicians and CIT Unit officers walking the mid-Market Street area, UN Plaza, and Union Square areas twice a week connecting the homeless population to services and treatment. The Department also continues to focus on the high-end users of psychological and medical services to reduce recidivism.  The Department has also created a monthly multi-disciplinary forensic public safety meeting where the CIT Coordinator presents cases to DPH on persons who pose a safety threat to themselves and/or the community.

### *Policy:*
The use of force by members is regulated through policies established according to local, state, and federal mandates. Department General Order 5.01, Use of Force, was approved by the Police Commission on December 21, 2016. The complete policy is available on our website at http://sanfranciscopolice.org/dgo.

### *Circumstances where use of force may be necessary:*
The use of force must be for a lawful purpose. Officers may only use reasonable force options in the performance of their duties in the following circumstances:

- To effect a lawful arrest, detention, or search.
- To overcome resistance or to prevent escape.
- To prevent the commission of a public offense.
- In defense of others or in self-defense.
- To gain compliance with a lawful order.
- To prevent a person from injuring himself/herself. However, an officer is prohibited from using lethal force against a person who presents only a danger to himself/herself and does not pose an immediate threat of death or serious bodily injury to another person or officer.

### *Levels of Force:*
Officers shall strive to use the minimum amount of force necessary to accomplish their lawful purpose.

**A. *Low Level Force.*** The level of control necessary to interact with a subject who is or displaying passive or active resistance. This level of force is not intended to and has a low probability of causing injury.

**B. *Intermediate Force***. This level of force poses a foreseeable risk of significant injury or harm, but is neither likely nor intended to cause death. Intermediate force will typically only be acceptable when officers are confronted with active resistance and a threat to the safety of officers or others. Case law decisions have specifically identified and established that certain force options such as OC spray, impact projectiles, K-9 bites, and baton strikes are classified as intermediate force likely to result in significant injury.

**C.** *Deadly Force*. Any use of force substantially likely to cause serious bodily injury or death, including but not limited to the discharge of a firearm, the use of an impact weapon under some circumstances, other techniques or equipment, and certain interventions to stop a subject's vehicle, such as vehicle deflections.

*Force Options:*

The force options authorized by the Department are physical controls, personal body weapons, chemical agents, impact weapons, extended range impact weapons, vehicle interventions, K-9 bites and firearms. These are the force options available to officers, but officers are not required to use these force options based on a continuum. While deploying a particular force option and when feasible, officers shall continually evaluate whether the force option may be discontinued while still achieving the arrest or lawful objective.

The following tools and techniques are not in a particular order nor are they all inclusive.
- Verbal Commands/Instructions/Command Presence
- Control Holds/Takedowns
- Impact Weapons
- Chemical Agents (Pepper Spray, OC, etc.)
- K-9 (Dog) Bite
- Vehicle Intervention (Deflection)
- Personal Body Weapons.
- Firearms
- Impact Projectile

*Documenting the Use of Force:*

Members are required by policy to immediately notify supervisors following a use of force incident, which is then documented and evaluated by the supervisor. Use of force reporting and evaluation forms have been redesigned to include all the elements and data fields required by state and local legislation. These forms must be submitted by the end of watch following a use of force incident.

Staff assigned to the Risk Management Office (RMO) are responsible for tracking and maintaining all data relating to use of force incidents. They continue to review data by district stations and specialized units. RMO, which includes the Internal Affairs Division and the Early Intervention System Unit (EIS), collects and analyzes the use of force data, i.e., under what circumstance it was used, type/level of force, and subject/ officer demographics which is available on our website at:  http://sanfranciscopolice.org/early-intervention-system

At the Chief's direction, work continues on developing a program which will expand on existing processes to audit station captains monthly on their unit's performance, use of force, stops, and other metrics with the intent of providing comprehensive and concise data in a timely manner.

The Department is currently looking to partner with a research/academic institution to perform in-depth analysis of the data.

## DESCRIPTION OF SUSPECTS OBSERVED AND REPORTED TO POLICE;

The following table represents suspect descriptions provided by members of the public when requesting police assistance via the Department of Emergency (DEM) dispatch. It also includes information/descriptions provided by victims and/or witnesses directly to officers during a call for service, as well as suspect information directly observed by officers who witnesses a crime in progress. This information is gathered during the call directly from the reporting party, entered by the dispatcher, and relayed to responding officers.

**Race/Ethnicity and Gender of Subject upon whom Force was used.**

The number of subjects upon whom force was used is less than the total number of force reported as officers may use more than one type of force on a subject.  Example; An officer may first point a firearm at a subject believed to be armed.  Once the subject drops the weapon, the officer may then have to resort to physical force to effect the arrest of the subject.
